Work

Web Developer (2013 – 2018)

TrpicalFishStore company - Web Developer, Management and SEO. Developed a website for an online store, initially on CMS ProstoShop, transferred to CMS WordPress 2017. Database setup and migration using • MySQL. Setting up a template and store modules. Using • HTML • CSS • JavaScript (jQuery). Online store administration (CMS ProstoShop, CMS WordPress).

Frontend Developer (2018 - Present)

Experience in software development of 1+ year. Actively practice and develop Frontend Developer skills in such IT schools as BEONMAX and UDEMY. To date I have passed the Webdeveloper, Linux / GIT, JavaScript (ECMA Script (ES5, ES6)), React, WordPress, PhotoShop SEO courses and more.

Automation Engineer (2012 - 2013)

Passed an internship and worked at the Kiev TPP 4. Was engaged in setting up and designing automation systems for thermal systems.

EDUCATION

Kiev Energy College (2004 - 2009)

Graduated from college with honors - bachelor's degree (KEK) Kiev Energy College. Specialty automation of thermal processes at TES (thermal power plants).

SKILLS

- HTML, Pug (jade)
- CSS, SCSS, SASS
- JavaScript (ECMAScript (5,6))
- TypeScript
- React. Js, NODE.JS (NPM)
- GULP, Webpack
- WordPress, ProstoShop
- MySQL
- Bootstrap
- GIT
- Photoshop, Chrome DevTools
- JIRA, Slack

University of Food Technologies (2009 - 2014)

Department of automation and computer integrated technologies, master's degree.

REDFOX (2019 - 2020)

English language course

BEONMAX and UDEMY, (2019 - Present)

IT programming courses and hanging developer skills.

Every year I take different courses. A huge advantage of the company will be the provision of courses to improve skills and the study of new technologies.

About myself

At the moment, I have a similar practice and work on improving and acquiring Frontend Developer skills. I would like to work, develop and create applications using the MERN STACK technology (Mongodb, Epress, React, Node) in the TypeScript programming language. I am very interested in getting skills in creating mobile applications on the React Native framework.

It is a perfect combination if there are such tools that the company uses, but I am also open to new different job opportunities and technologies.
