University of Food Technologies (2009 - 2014)

Department of automation and computer integrated. Technologies, master`s degree.

A b o u t m y s e l f

Ever since I was young, I have always been fascinated by the world of technology. Growing up, I spent countless hours tinkering with computers, experimenting with code, and exploring the latest software applications. As I got older, my passion for technology only grew stronger, and I decided to pursue a career in software development. Throughout my career, I have worked with a wide range of technologies, including JavaScript, TypeScript, React Native, React.js, and many others. I have developed expertise in building high-quality software applications that are both efficient and user-friendly, and I have a proven track record of delivering projects on time and within budget. In my free time, I enjoy working on personal projects to continue honing my skills and exploring new technologies.In summary, I believe that my skills and experience make me a strong candidate for any development role. I have a proven track record of delivering high-quality projects, working collaboratively with other developers and stakeholders, and continuously learning and improving my skills. I am excited about the opportunity to bring my expertise to a new team and contribute to the success of your organization.
